PARROT, PICOTEE and PEONY TULIPS

THREE VERY UNUSUAL VARIETIES

Paperwhite Narcissus are one of the most popular of the winter-flowering bulbs. In bloom in just a few weeks they can be the first to flower for Christmas and by starting them at intervals they can be kept in bloom until Easter. They grow best in water with pebbles. Placing half a dozen or more in a bowl, standing them in small stones or gravel, setting them away in a dark place for a week or ten days in root, having the bulbs well covered with water and then bringing them out into the light they will bloom for you without any other care in a very short time.

10 for Only ———— $1.00

Narcissus

Narcissus are especially valuable for naturalising in the woods, in odd corners, under trees, about cows, etc., for bordering walls and paths and for grouping in the Hardy Borders, for cutting and for forcing in pots in the window or the green house so you cannot possibly have too many Narcissus.

BREEDER TULIPS ASSORTED VARIETIES

The Breeder Tulips are the variety in which you find many wonderful deep rich coloring. These bulbs are available in different-colored and are completely without stripes or feathers. They are recently grown in Holland as separate varieties because of their wonderful coloring and enormous flowers which are produced on tall stems like the Darwin and bloom at about the same time. Regular price run up to $1.50 per dozen. For a quick clearance we will send you
